

To Whom It May Concern:

I have been a loyal listener of the K-LOVE national FM radio stations for more than two years, and a regular financial support for one year. In a media culture saturated with negative images, I find solace when tuning into positive, encouraging K-LOVE. This commercial-free service is vital to the communities nationwide that it serves. It is truly a blessing to listen to a pure positive message, without slant. Even the local FM Christian radio station plays content that I find unacceptable to my young children: election year campaign ads and divorce lawyers. But through K-LOVE, whether I am in town or away on business, I can enjoy quality programming that I trust to be free of crass DJs; "E.D.", suggestive or truth bending commercials, and music inappropriate for my young children. If K-LOVE were to be replaced by another LPFM, I believe that the quality of programming would be degraded nationwide. You see, I have listened to K-LOVE in at least three states, and I can always trust that the programming will be of the highest caliber. With LPFM stations taking priority over translator services, you would have more choices, but less consistence and quality.

Thank you for your time. I ask for your continued support in allowing K-LOVE to retain its priority as a FM translator service.
